

# Jeppesen International Trip Planning

Jeppesen International Trip Planning Services answer the needs of you, your flight departments, and your passengers from Australia to Zambia. With preflight planning and preparations, Jeppesen offers an unparalleled network of local handlers and knowledgeable staff who know the area and their business, and everything you need to be assured of a successful trip. *Anywhere.*

## Regionally Located, Globally Experienced

- Trip planning offices in the US, Europe, Middle East, India and China give us a unique insight to the world
- In-country relationships provide real time information and the highest quality services

## Itinerary, Route, Fuel Planning and Permits

- Itinerary planning based on your aircraft's performance and range limitations, field lengths and aircraft support services
- Permits, slots, and overflights easily obtained. They'll know you're coming and they'll be waiting for you.

## Jeppesen Handler Network

- Worldwide network of handlers who know the local area and understand flight operations.
- Handlers must pass strict criteria to join the Jeppesen network and are evaluated regularly thereafter.
- Established credit with handlers eliminates the need for crews to carry cash.

## Jeppesen World Fuel Services

- Contract fuel through World Fuel Services ensures a reliable, competitively priced fuel supply.
- Available at more than 2000 locations worldwide.
- On-site fuel representatives provide timely price quotes and releases.

## Jeppesen Corporate Travel Services

- In-house travel offices can assist passengers and crew alike with hotels, airline reservations, and car hire.
- Anyway you want – by location, room rate, star rating, you name it.

## Convenient Web Portal and Planning Tools

- Jeppesen web portal for immediate, accurate updates on your trip.
- General operational information, including airport data and alerts.
- Country-specific landing, overflight, passport, health and visa requirements.

# Jeppesen International Trip Planning

## Flight Planning

- Based on your aircraft's performance, navigational information, and forecasted weather to ensure maximum fuel optimization through careful route and profile selection.
- Databases specific to your aircraft, adjusted for your airplane's certifications, and its unique characteristics of performance so you get an individualized flight plan.
- Critical information at your fingertips: equal-time points, ETOPS, depressurization and engine-out computations.
- Outputted in more than 500 standard and custom formats or transmitted directly to your FMS so you can get your plan the way you need it.

## Enroute Charge Reports

- A money-saving feature, enabling you to preview and fly the route with lowest navigation charges.
- Also useful in preparation of trip quotes and in post-trip audit of fees.

## Weather and NOTAMs

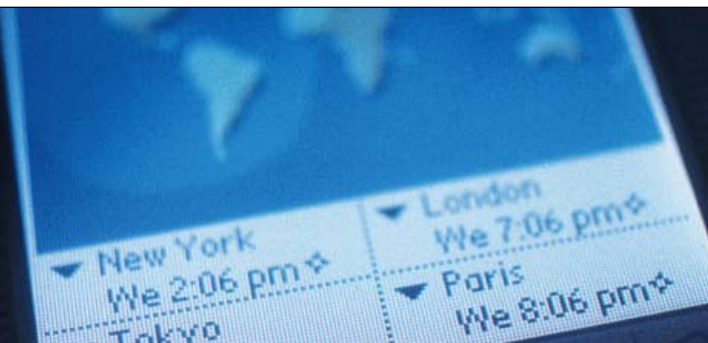

- World-class meteorologists available around the clock for briefings, oral or written, customized to the weather in your flight path so you always know what to expect.
- Jeppesen NOTAMs decoded and filtered in an easy-to-read format by individual airport or Flight Information Region (FIR).

## Innovative Pricing and Clear, Concise Billing

- Unique and competitive pricing models.
- No hidden fees, no retainers, no surprises.
- Proprietary Trip Cost Estimator for Jeppesen, third-party and air navigation fees.
- Detailed, easy-to-read and understand invoices.

## Jeppesen Knows the World

Count on Jeppesen for your international trip planning. We know we're only as good as our last flight. That's why we handle every need and do what we say. Every time. Without exception. Without excuses.
